

I am very proud to offer my support to XM radio. The Instant traffic and weather is extremely helpful to any person traveling over the road, Its very valuable in the sense that it is real time information and you can check on it when you need it most. There is no sense in this even being an issue, why would you want to take away something that will help people on the go so they can know where accidents are, what the weather is looking like where they are heading, this service will undoubtedly cause less accidents and save lives by helping people make the decision to take alternate routes or even maybe stop and get a motel room or get off the road to avoid a serious weather condition that they may otherwise travel into if they didnt have this service. Thank you.
